### Descrição

Perfil pretendido ARE YOU READY FOR A NEW CHALLENGE?

Celonis is one of the world's fastest growing technology companies and the global market leader in process mining software backed up by our investors Accel and 83North. Our recent \$1 billion valuation makes us a "unicorn", yet with an ever-growing global customer and employee base we no longer consider ourselves a start-up. Instead, we retain the dynamic, innovative atmosphere of a young company with the benefits of a mature enterprise. As we expand into the UK market, we are looking for enthusiastic and talented individuals who are real networking enthusiasts. Take advantage of this unique opportunity to build your career by joining our small team and making a big difference!

At Celonis, you analyse real data from our customers to increase transparency in business processes of any kind. Thereby, you use our Celonis Process Mining Technology in different proof-of-concept projects to demonstrate the value our software generates. Thanks to your conceptual working method, you generate conclusive examples and scenarios during this trial project and focus on the most relevant KPIs to convince our customers of its performance and benefits. In doing so, you react to individual needs of customers from various industries and in conclusion present your findings in front of managers and decision makers.

You will spend your first year in our Center of Excellence in Madrid, being guided by experienced experts, in order to apply this knowledge afterwards in the UK region.

YOU...

- ...have graduated with an exceptional degree in the area of mathematics / physics / industrial engineering / business informatics / business / economics
- ...have experience in consulting and are highly interested in Data Science and Big Data
- ...think analytically, work in a structured and solution-oriented manner and quickly comprehend new topics and interrelationships
- ...have strong communicational skills and enjoy interacting with various customers to convince them of the value of our software
- ...like organising and structuring workshops for customers and are confident in defending a business case in front of C-Level stakeholders
- ...are fluent in written and spoken English

WE...

- ... see people as the fundamental pillar of our success. Therefore, we invest into the personal growth and skill development of each individual alongside with the strength finder test
- ... offer attractive compensation models (best-in-class salary, stock option packages, employee referral bonus, family service, flexible working hours, ...)
- ... are visionary and one of the fastest growing Software-Unicorns in the world
- ... are Process Mining experts and developed the world's most powerful tool for analyzing, optimizing and transforming all IT-supported business processes: the Intelligent Business Cloud
- ... distinguish ourselves through a unique combination of innovative start-up atmosphere paired with great professionalism and self-responsible work
